

Expand and Transform Your Insurance Digital Footprint

Insurance Delivery

Anywhere | Anytime | Any Device

Digital transformation of insurance is one of the hottest trends in the industry today. The “digital native” generation is reaching that phase in life where they will need and will procure insurance. Digital transformation in the insurance industry is exciting because it enables new and innovative thinking about how to market, sell, deliver and service mobile savvy insurance consumers.

Digital transformation for insurance carriers provides for the opportunity to innovate their customer facing technology platforms while also implementing a flexible infrastructure.

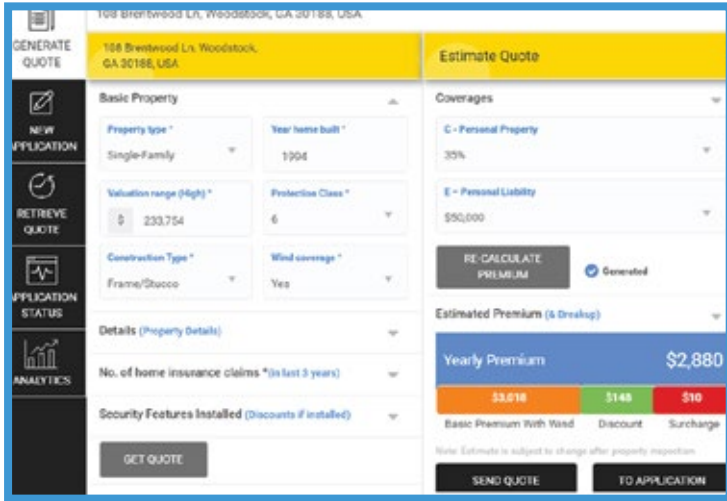

Cogitate Technology Solutions developed the platform to execute the digital transformation of insurance. Digital Insurance Delivery Platform™ is a comprehensive, end-to-end digital insurance delivery platform solution.

Digital Insurance & Engagement Platform enables carriers, Managing General Agents, Wholesale Brokers and retail agents to transform the way they do business with their current and future customers. Digital Insurance & Engagement Platform also enables enhanced marketing, sales and service opportunities and provides cost savings in the process.

Why Digital Insurance & Engagement Platform

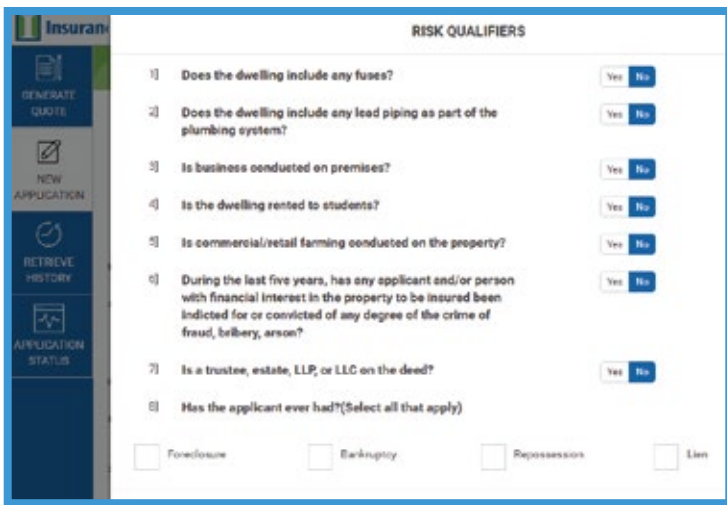

- Wide array of features throughout the digital platform
- Scalable to accommodate your growth targets
- Easy to modify to adapt to changing customer needs and expectations
- Seamlessly integrated solutions across web and mobile platforms
- Cost effective customization

Case Study

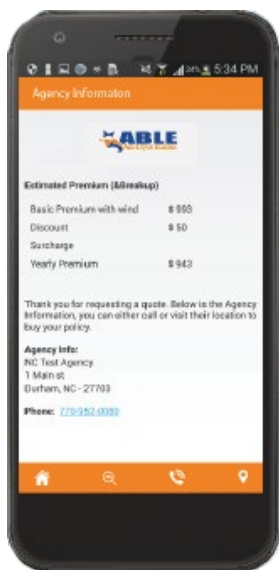

The Business Case:

Personal Property Express™ (“PPE”) is a comprehensive, end-to end individual homeowner’s product, built on the **CLOUD/APP/WEB/BI/ML/DR**. From the very initial stages of the collection of risk information all the way through to the issuance of the policy and the receipt of premium, this product is completely digital via web and mobile customer facing technology.

The Risk Information Collection & Underwriting Process:

PPE is a customized solution for a Lloyd’s Broker and Syndicate developed on the **CLOUD/APP/WEB/BI/ML/DR** on behalf of their respective U.S. Cover holders. Beginning with the automated risk information collection and validation using outside 3rd party data providers through to the underwriting questions, application process, digital policy issuance and billing process, this solution is cutting edge quick and accurate. There are numerous additional features in this solution, including the ability to assess catastrophe exposure real time, through the geo-fencing technology available in Digital Insurance Delivery platform.

Additional features provided in this case study from the Digital Insurance & Engagement Platform PPE produce include:

Rate, quote, bind, policy issuance, billing, ability to make a payment, extension to Cogitate’s Mobile Agent™ product, and seamless data integration through the entire insurance value chain from retail agent, MGA, Lloyd’s Broker and Syndicate. Risk information collected, validated and digitally delivered simultaneously through the value chain.
