

DigitalEdge Distribution Management

Insurance Technology by Insurance People

DigitalEdge Distribution Management (DDM) simplifies the management of your agency and agent relationships. Easily access and navigate agency information for real-time response, service requests, and status changes. At your fingertips, we've unified all aspects of your business arrangements with your agencies and agents – agreed business terms, assigned products, locations and subagencies, staff and their roles, commissions, and more. You know first-hand how quickly agency ownership is changing – so we've made sure you can swiftly reflect agency sales and mergers & acquisitions to map book transfers or stop activity in real time.

Look, managing relationships can be hard – but managing your agency partnerships doesn't have to be. With DDM you can easily manage complex relationships for faster response times, better outcomes, transparency, and measurability. Better relationships translate to better business.

Real-Time Organized Data

DDM stores and manages data on your agencies, locations, and agents for real-time authentication to your policy administration system. This includes agency details, location details, broker codes, banking information for commissions and sweeps, and tax information for 1099 purposes. DDM supports multiple locations for an agency. Editing and adding new locations is easy!

Mapping of staff

The staff of an agency can be mapped to a specific location or role. This supports authentication to your policy administration system by staff type, allowing you to place controls on what staff members can service.

Commission management

Manage the commission rates for each agency, by products, coverages, and location. Through seamless integration with your policy system, calculate the commission being paid on each premium while respecting the hierarchy by master agency and location.

Agency Sales and Mergers & Acquisitions

Easily manage agency transitions with a smooth book transfer. Ensure data integrity and compliance of product mapping, and facilitate efficient staff transfer with a rich audit trail.

Restrictions & Exceptions

React in real-time when catastrophic conditions are coming! You define your restrictions and exceptions to block or allow agencies, locations, or agents access to service specific products in specific areas for a specific timeframe.

- Data organized by primary and branch locations
- Manage the commission rates by products, coverages & location
- Commission statement generation to reflect agency/location payout
- Authenticate policy system access by user type and location
- Manage agency relationships through ownership transitions
- Reflect sale, mergers & acquisitions of location/agency
- Seamless staff transfer of location/agency
- Set restrictions or exceptions at agency or location level

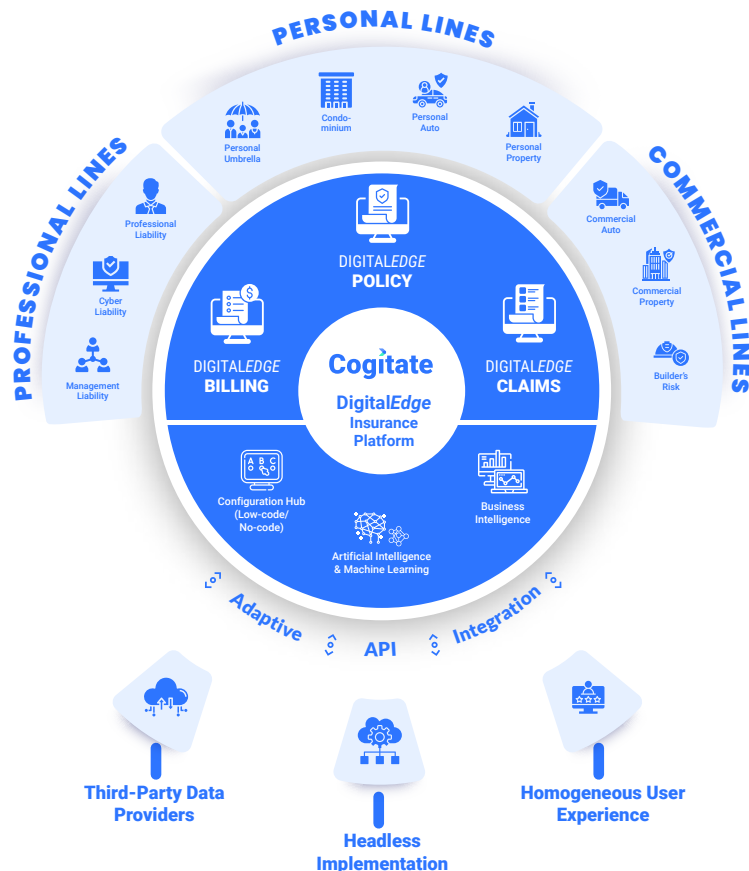

DDM is available for integration with your current policy system, but ask us about DigitalEdge Policy for a data-driven, powerful combination!

With Cogitate, your business initiatives are no longer at odds with your technology. Our solutions are designed to operationalize your goals for profitable growth, product innovation, and geographic expansion.

- The DigitalEdge Insurance Platform is a cloud-native, microservices-architected suite that creates a homogenous, user-friendly experience across policy, billing, and claims.
